

Intelli-Flip™ SYSTEM®

SMART INVENTORY MANAGEMENT

The patented LogiQuip® Intelli-Flip™ System* combined with our patented ParWall® and ParWire™ Kanban Divider products provides intelligent, inventory management. This powerful pair helps to reduce supply chain costs and stockouts, allowing caregivers to focus on quality patient care.

HOW IT WORKS

LogiQuip's innovation replaces the traditional **Two Bin System** and takes the **Kanban Divider** to the next level. Our simple, responsive and intuitive system allows you to better track inventory through the natural act of accessing inventory.

SIMPLE

Attach the **Intelli-Flip Monitor** to each **Kanban Divider** in the inventory bin you wish to track.

RESPONSIVE

When the Caregiver accesses the safety stock by lowering the **Kanban Divider**, a signal is sent to the **Controller** that inventory needs to be replenished.

INTUITIVE

The **Controller** then relays this information to your **Custom Dashboard** on Intelli-Flip.net where you can easily view inventory status by **Bin**.

The **Intelli-Flip System** takes inventory management to a lean, system-driven process that will increase productivity and patient satisfaction while reducing labor and costs for smart inventory management.

LIMITED 5-YEAR WARRANTY

LogiQuip products are covered by a **Limited 5-Year Warranty** from date of receipt against defect in materials or workmanship under normal use and service, excluding **Electronic Components, Cart Covers, Custom Products, LogiCell Tambour Doors, Label Holders, and Casters**. During this period, LogiQuip will, in its sole discretion, repair defects in materials or workmanship that existed when the product was received or replace the product. If the product is replaced, the new product will be warranted for the remaining term of the original product warranty period. Visit LogiQuip.com/Warranty for more details.

LOGIQUIP® INTELLI-FLIP® FEATURES & BENEFITS

KANBAN SYSTEM INTEGRATION

Intelli-Flip® integrates with our existing patented ParWall and ParWire™ Kanban Divider products for easy installation. In addition, the ParWall and ParWire Bins and Dividers are customizable to accommodate a variety of sizes.

INTELLI-FLIP MONITOR

The Intelli-Flip Monitor easily attaches to our Kanban Divider and is triggered by the natural act of accessing the safety stock. The Monitor uses AAA batteries and requires no tools for installation or maintenance.

CONTROLLER

The Controller collects data from each Monitor and sends it to a secure database at Intelli-Flip.net. The Controller retains the data collected 24/7, even in the event of a power outage, preventing any loss of important inventory information.

INTELLI-FLIP.NET

This web-based site gives you access to a customized dashboard for easy inventory management. No additional software is needed. This secure dashboard offers a variety of information to help ensure you never run out of stock.

SERVICE PACKAGES AVAILABLE

Take Intelli-Flip to the next level! Choose from a variety of service packages that provide the ability to reduce inventory value, automate the reordering process as well as track and respond to inventory trends.

Contact your local LogiQuip Representative for more information.

1 The Intelli-Flip Monitor is attached to the Kanban Divider. A signal is sent to the Controller when accessing safety stock.

2 The Controller gathers data from the Intelli-Flip Monitors which is stored in the cloud.

3 Review and manage your data on Intelli-Flip.net, a web-based portal.

4 A pick-list is created, product is pulled and sent to the appropriate stocking location. The Intelli-Flip Monitor is reset when supplies are restocked and the Divider is moved to the "up" position.
